

Stop Motion Studio

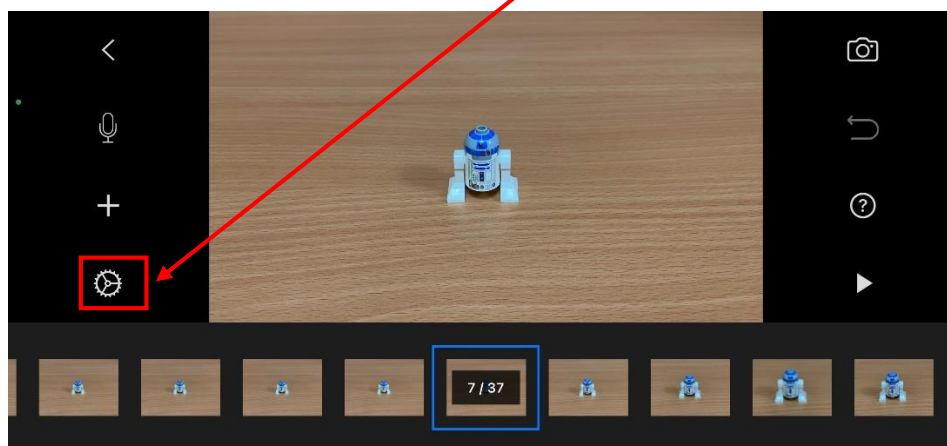

Create your own animation movie

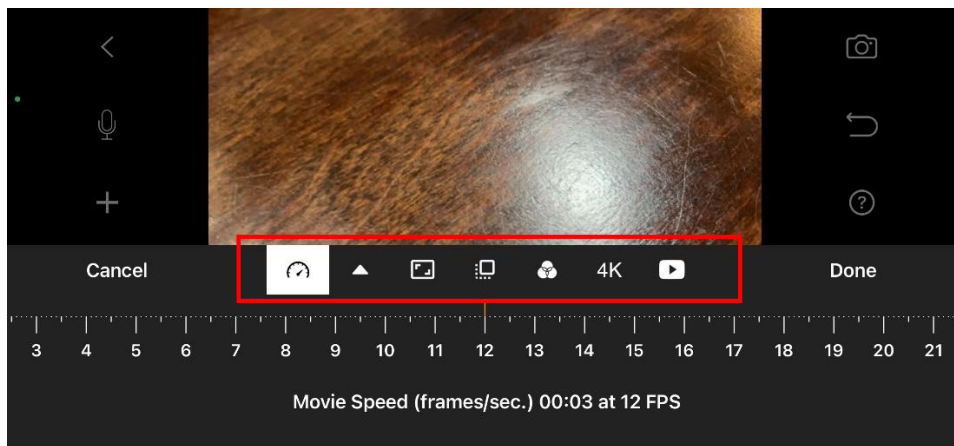

1. Download and install the free *Stop Motion Studio* app for your phone or tablet from App Store (iOS) or Google Play (Android).
2. Launch Stop Motion app and allow camera access for the first time. To start your movie tap on the big button *New Movie*

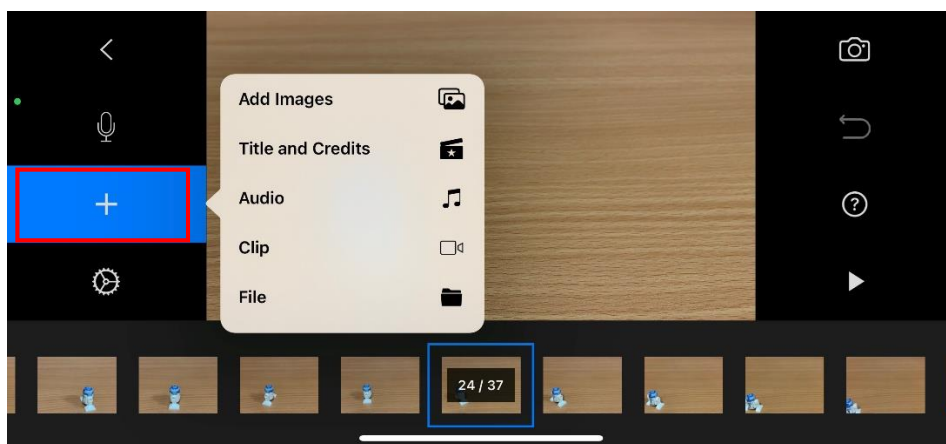

3. The gear icon gives us access to some *Settings*: Movie speed, Fade, Aspect Ratio, Foreground, Filter, Quality, Playback.

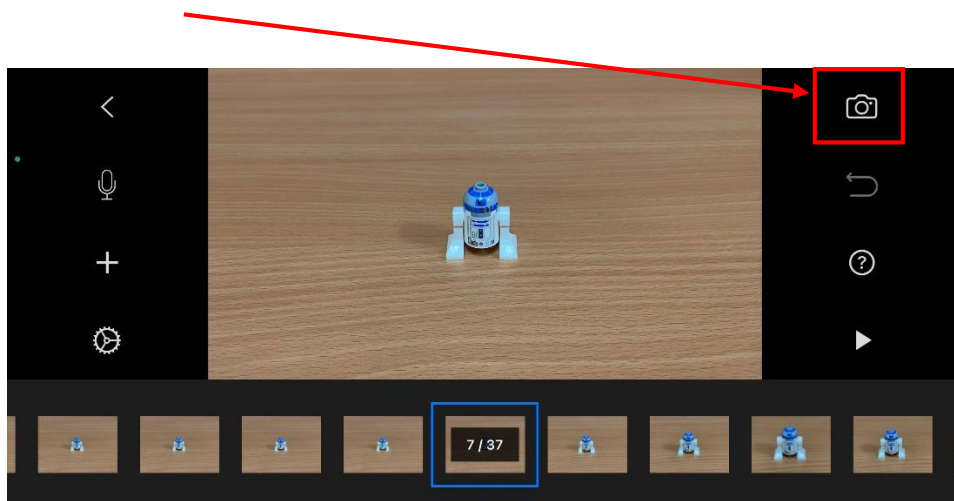

4. If there is a need, change movie Setting. For example, if you set 12 frames/sec. speed, it means you need to take 12 pictures to have 1 sec. movie.

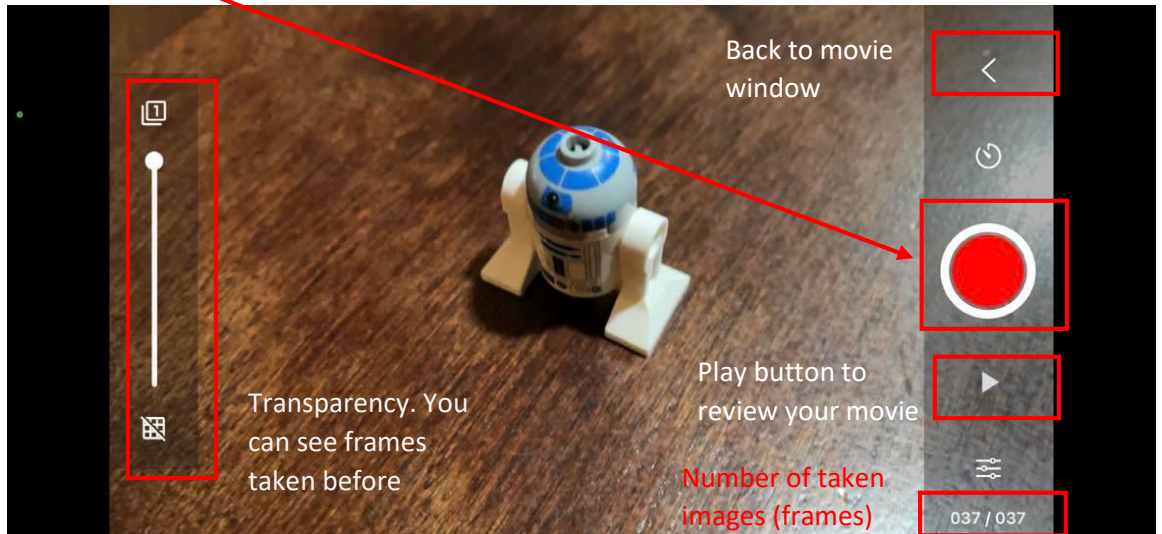

5. Tap on + button to add audio or sound effects and in paid version: titles and credits, audio ,clip and file.

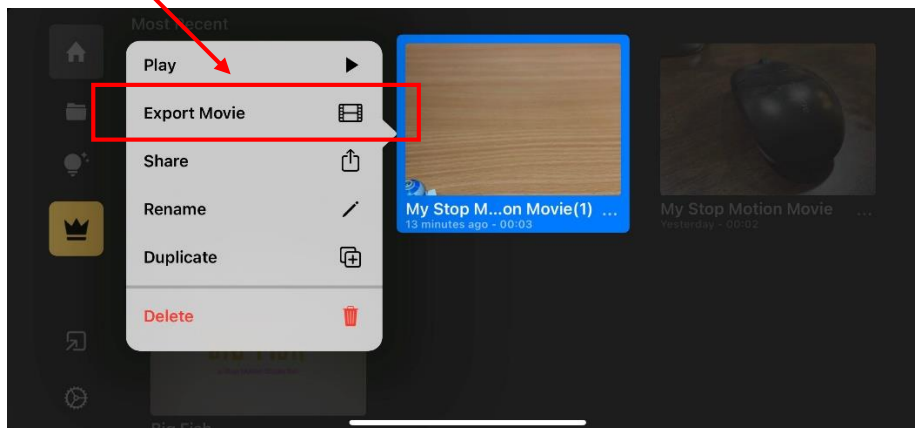

6. Tap on *Camera* icon to start taking photos for your movie.

7. Press on **Red dot** button to capture image.

8. Press Back < button to reach your app home window. Tap and hold while opening the menu with **Export Movie** choice.

9. Choose where you want to export your work. Not to loose the quality of the movie it is suggested to export it to Google Drive, Drop Box etc.
